[Docket No. FAA-2017-0953; Airspace Docket No. 17-AEA-15]

Proposed Amendment of Class E Airspace; Massena, NY

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of proposed rulemaking (NPRM).

SUMMARY: This action proposes to amend Class E surface airspace and Class E airspace extending upward from 700 feet above the surface at Massena, NY, as the Massena collocated VHF omnidirectional range tactical air navigation system (VORTAC) has been decommissioned, requiring airspace reconfiguration at Massena International-Richards Field Airport. Controlled airspace is necessary for the safety and management of instrument flight rules (IFR) operations at the airport. This action also would update the geographic coordinates of the airport.

SUPPLEMENTARY INFORMATION:

Authority for this Rulemaking

The FAA's authority to issue rules regarding aviation safety is found in Title 49 of the United States Code. Subtitle I, Section 106 describes the authority of the FAA Administrator. Subtitle VII, Aviation Programs, describes in more detail the scope of the agency's authority. This proposed rulemaking is promulgated under the authority described in Subtitle VII, Part A, Subpart I, Section 40103. Under that section, the FAA is charged with prescribing regulations to assign the use of airspace necessary to ensure the safety of aircraft and the efficient use of airspace. This regulation is within the scope of that authority as it would amend Class E surface airspace and Class E airspace extending upward from 700 feet above the surface at Massena International-Richards Field Airport, Massena, NY, to support IFR operations at the airport.

SUPPLEMENTARY INFORMATION:

Availability and Summary of Documents for Incorporation by Reference

This document proposes to amend FAA Order 7400.11B, Airspace Designations and Reporting Points, dated August 3, 2017, and effective September 15, 2017. FAA Order 7400.11B is publicly available as listed in the ADDRESSES section of this document. FAA Order 7400.11B lists Class A, B, C, D, and E airspace areas, air traffic service routes, and reporting points

The Proposal

The FAA is considering an amendment to title 14, Code of Federal Regulations (14 CFR) part 71 to amend Class E surface airspace and Class E airspace extending upward from 700 feet above the surface at Massena International-Richards Field Airport, Massena, NY. The segment within 1.8 miles each side of the Massena VORTAC 286° radial extending from the 4-mile radius to the VORTAC would be removed in Class E surface airspace; and the segment within 2.7 miles each side of the Massena VORTAC 106° radial extending from the 7.4-mile radius to 7 miles east of the VORTAC would be removed in Class E airspace extending upward from 700 feet above the surface, due to the decommissioning of the Massena VORTAC, and cancelation of associated approaches. This action would enhance the safety and management of IFR operations at the airport. The geographic coordinates of

the airport also would be adjusted to coincide with the FAAs aeronautical database.

Class E airspace designations are published in Paragraphs 6002 and 6005 respectively, of FAA Order 7400.11B, dated August 3, 2017, and effective September 15, 2017, which is incorporated by reference in 14 CFR 71.1. The Class E airspace designation listed in this document will be published subsequently in the Order.

Regulatory Notices and Analyses

The FAA has determined that this proposed regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current. It, therefore, (1) is not a “significant regulatory action” under Executive Order 12866; (2) is not a “significant rule” under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) does not warrant preparation of a Regulatory Evaluation as the anticipated impact is so minimal. Since this is a routine matter that will only affect air traffic procedures and air navigation, it is certified that this proposed rule, when promulgated, will not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

Environmental Review

This proposal would be subject to an environmental analysis in accordance with FAA Order 1050.1F, “Environmental Impacts: Policies and Procedures” prior to any FAA final regulatory action.
